WCTE flow diagram

When filling the detector with water, what route does the DI water take?

What is the route between valves 27 and 28 for?

What is this?
Do I need to operation this?

Device to measure transmittance?

Other questions

- Is it basically operated using a touch panel?
- Is the control panel already available?
How complete is the device?
- I want to understand how to use the control panel by actually checking it out.
- I checked the manual on how to use the device, but I would like to be given more details on site.
